

Naval **NETWAR FORCEnet** Enterprise

In today's global climate of business and economy, the landscape of defense and government contracting has never been more dynamic – providing some of the greatest challenges industry and government have ever faced. With these challenges bring exciting opportunity.

For the third consecutive year, the Program Executive Office for Command, Control, Communications, Computers, Intelligence (C4I) and the Naval Network Warfare Command (NETWARCOM) will join SPAWAR and the National Defense Industrial Association San Diego Chapter in presenting the 12th annual "Naval NETWAR FORCEnet Enterprise and Industry Conference" conference that has grown to be the major West Coast symposium for discussing joint C5ISR - Command, Control, Communications, Computers, Combat Systems, Intelligence, Surveillance, and Reconnaissance - issues facing the warfighter.

Senior officials from these commands will share their perspective on how the Naval NETWAR FORCEnet Enterprise (NNFE) collectively enhances the delivery of network centric operations to the fleet and the Joint Warfighter and will provide a forum for discussion of acquisition strategies and business.
